

COOPERATIVE ECONOMIC INSECT SURVEY REPORT  
Glenn A. Salsbury, Survey Entomologist

Report 6, Volume 57  
May 12, 2009

ARMYWORMS: Ten per square foot were found in one field of dense wheat near Crestline in Cherokee County. Larvae were in the second instar. In one other field of thin wheat no worms were found.

EGGPLANT FLEA BEETLE: Numerous adults were found on eggplant in Crawford County.

ASPARAGUS BEETLE: Adults are now active on asparagus. No eggs were found.

FLETCHER SCALE: Found on yews.

BARK BEETLE: Adults of an unidentified bark beetle were found infesting white pine at a nursery in Kansas City. The 88 trees had been brought in from Tennessee.
